

TRANSLATION

Market efficiency through translation

Using a pool of over 3,000 translators worldwide with specializations in various industries, we guarantee you top quality translation in over 90 Asian, Slavic, Germanic and Romance languages.

Translation, the conversion of text from one language into another language including accommodations for cultural differences in the way the information is conveyed. Localization and globalization include translation as a step.

Multimedia

Responding to customer needs for high quality translations of corporate communications materials, we developed the resources and technical foundation to support a wide range of electronic information formats.

- Marketing Presentations
- Proposals
- Manuals
- Training Courses
- Audio/Video Transcription
- Translation of Transcripts

We work with both the creation of new media and the translation of existing multimedia projects.

Localization

Localization is the process of altering an application so that it is appropriate for the geographic area in which it is used.

different countries or languages because the correct order of characters in one language might be incorrect in another.

We support localization of a wide range of electronic applications:

- Web sites (HTML, DHTML, XML)
- Software applications on any platform
- CAD Drawings
- Multimedia Presentations
- Flash/Director/Power Point)

Publishing

We offer full, multilingual publishing capabilities, both for the printing of translated materials and for the creation of new multilingual print communications.

The Publishing Department is an integral part of the process for the translation of print materials. Once a project is close to completion, the materials are sent to the Publishing Department for final formatting and delivery.

A worldwide network of experienced translators includes unique talent such as a professor of Telecommunications at São Paulo University to translate Portuguese telecom projects or a Ph.D. Engineer from the Oil and Gas Ministry in Moscow to translate Russian Oil and Gas documents.
